**MASTER METER EFFECTIVE BILLING CYCLE 1 (October 1, 2016)**

Where feasible, each unit (apartment or business) of a multi-unit complex will be individually metered. For new construction, individual meters will be required. Where it is not feasible to retrofit individual meters, cost of water and wastewater consumed billed to the owner of the multi-unit complex will be calculated in the following manner:

- (a) Total water metered will be divided by the number of units (apartments or businesses) in the complex and an averaged consumption per unit determined.
- (b) An equivalent bill per unit will be determined based on average consumption per unit as calculated in (a) above. The amount of the equivalent bill will be the amount all other residential customers would have paid had they used a quantity of water equal to the average consumption per unit.
- (c) Owner will be billed an amount equal to the equivalent bill per unit multiplied by the number of units in the complex.
- (d) Owner will be billed base charge fee per each individual unit.
